Window and door system

KBE 76 Outward opening residential door system - AluClip

Outward opening residential doors are used in commercial buildings as emergency exits and in private households with certain hallway layouts. The doors in the AluClip version unite the advantages of the materials of aluminium and plastic. Aluminium on the exterior offers practically unlimited design options, while the plastic profiles on the inside deliver dimensional stability and high functional reliability.

KBE 76 doors with 76 mm construction depth

» **Top range**

Front doors, balcony and patio doors, parallel slide-and-tilt doors.

» **Top ergonomics**

Barrier-free threshold at only 20 mm high.
